I am a highly motivated individual with a passion for Frontend Engineering. I have experience in creating efficient and user-friendly UI and I have a good understanding of Accessibility, browser compatibility and responsive design. In my previous role as a mixer truck driver, I developed my time management and multitasking skills that have helped me to become adaptable and able to handle stress efficiently.

SKILLS

- HTML
- CSS & SASS
- JavaScript
- Chai & Mocha
- React
- Redux
- React Routers
- TypeScript
- Node.js
- Express.js
- REST API
- Fetch & Axios
- Cypress
- ESLint
- Prettier
- Webpack
- NPM
- Git
- GitHub
- Figma

PROJECTS

FUEL BUDDY

<https://github.com/dgubko/fuel-buddy>

Tech: React, React Router, TypeScript, Cypress, CircleCI.

Description: Fuel Buddy is a React web app that displays top gas stations using an API. It has a live search bar and drop-down menu for fuel type. The app displays details of the selected gas station, including prices and amenities, and allows users to save to favorites.

BOARD GAME BONANZA

<https://github.com/dgubko/board-game-bonanza>

My Tech Stack: React, Typescript, React Router, Cypress.

Description: Board Game Bonanza is an intuitive application that displays the top 100 board games retrieved from the Board Game Atlas API. App interface allows user to search specific game by name and make it favorite. Also user can leave a comment for any game.

OVERLOOK

<https://github.com/dgubko/Overlook>

Tech: HTML, CSS, Vanilla JS, Chai & Mocha, Webpack

Description: Overlook is a hotel management tool for hotel customers and staff to manage room bookings and calculate customer bills. Customers can see their own past and future bookings, total spent amount for all time or reserve a new room.
