Languages & Technologies
- **Proficient:** JavaScript, ReactJS,HTML5, CSS3,
- **Exposure:**Express ,Figma, GraphQL, TypeScript

Project work

MoodTunes | Group Project|[Deployed link](#)　　　　　　　　　Project Time: Two Weeks
- Designed and developed a React application with responsive design to help users search for a song based on a mood they're feeling
- Successfully self taught Typescript and implemented it in the project.
- End to end testing with Cypress

League Helper| Solo Project| [Deployed link](#)　　　　　　　　Project Time: Five Days
- Created a Responsive React application, designed to help users who are starting a game called 'League of Legends' to help them find a character to try out from the diverse 161 character list
- Incorporated classmates feedback through reviews on code, as well as successfully deployed an application that is responsive on mobile screens.
- End to end testing with Cypress

Funky Nightshades | Partner Project |[Deployed link](#)　　　　　　Project Time: Five days
- Applied React Router to mimic a multi page application from our application
- Successfully deployed a project for the first time, as well as built our own Express server api and successfully fetched data from it.
- End to end testing with Cypress

Experience

Server | Texas Roadhouse (11/25/2018) - Present.
- Provided quality customer service in a fast paced environment
- Performed effective and efficient tasks to maintain smooth operations.

Catalyte | Full Stack Developer , 4 months
- Created single page applications using Javascript
- Studied computer languages to become a full stack developer like SQL,Java and JavaScript

Education

Front End Engineering Certificate of Completion:
- Created complex single page applications using Javascript, HTML and CSS
- Self taught TypeScript
- Learned the React framework for Javascript as well as React Router so single page applications could mimic multipage features.
