| • Postman | • GitHub | • Active Record | • Agile Development |

PROJECTS

[Foodive-Github](#) [Foodive-Heroku](#) 15 Day Group Project

- Collaborated with 7 students in a 7 person team to develop an application using agile process and focusing on Service Oriented Architecture. Backend code was written in Python on Django.
- Developed an application to randomly select restaurants in the user's area by clicking a button. A restaurant's rating, price, and food category are displayed once selected.
- Used continuous integration tools to build and automate the deployment of features

[TheList-Github](#) [TheList-Heroku](#) 10 Days Group Project

- Created a complete backend and frontend web application with a team of 6.
- Users can browse movies and books, recommend them to friends and store their recommendations.
- Utilized Bootstrap to create a user interface of production quality.

[Viewing Party Lite](#) 5 Day Duo Project

- A Rails application allows users to explore movie options and create online viewing parties.
- Consumed Movie Database APIs for movie viewing information.
- Tested the entire application using Rspec.

EXPERIENCE

New Horizons 2017-2021

Lead Teacher. Teach preschoolers in a group of 25 kids per class. Incorporate students' desires and needs into daily planning. Create and design an innovative curriculum, making changes based on student feedback, behavior, or performance on tasks.

Boulder Housing 2016-2017

Property Manager. Managed property operations in compliance with Fair Housing Laws. Responsible for compliance reporting and office management. Supervised small teams of 5 at each site.

EDUCATION

Turing School of Software and Design, BE program Denver, CO 2022
