

ETHAN NGUYEN Software Developer

Highlands Ranch, Colorado • etnguyen16@gmail.com • 720-473-6025 • [Linkedin](#) • [Github](#)

SUMMARY

I am a software developer in training determined to do highest quality work in the most effective way. I am currently studying at Turing School of Software & Design for the backend program.

I have spent the last several years working in retail. This experience helps me approach software development with keeping an attention to detail and double checking that I am providing high quality code.

I am currently learning Ruby. I have little experience with Python, little experience with HTML, and some experience with JavaScript.

SKILLS

- Ruby(Rails, ActiveRecord)
- SQL
- HTML/CSS
- TDD
- Git & GitHub
- Heroku
- Rest APIs
- Python
- JavaScript

SOFTWARE PROJECTS

Little Esty Shop | group project | [Repository](#) July- 2022

Project Purpose: Collaborated on a team of 4 developers to create a program that simulates a website that shows all data on the shops as well as their items. It also uses an API in order to calculate discount data based off of holidays

- Project description: Utilized Ruby to fabricate readable code that follows TDD.
- Utilized daily standups and agile workflow to plan what needs to be accomplished by the end of the day
- Technologies Used: Ruby, TDD, GitHub, RSpec, OOP

Consultancy Project | group project | [Repository](#) July- 2022

Project Purpose: Collaborated on a team of 8 developers to use a schema designer that will create a web page where users can use CRUD resources as well as other functional methods in order to find the nearest bathroom, look at reviews, create new bathrooms, and create new reviews.

- Project description: Utilized rails, active record, and CSS/HTML to create readable tests and methods that follow TDD
- Utilized agile workflow to outline code architecture and functionality at a high level through test driven development and object oriented programming
- Technologies Used: Active Record, TDD, GitHub, Heroku, HTML, CSS, Postman, GraphQL.
