SOFTWARE PROJECTS

Refugee Aid | [FE Repo](#) | [BE Repo](#) | [Deployment](#)

Tech: Ruby, Ruby on Rails, GraphQL, RSpec, React, Node.js, Apollo GraphQL, Cypress, CircleCI

Connects volunteers with Refugee Organizations to fulfill aid requests based on location.

- Real-time Feed: A dynamic feed showcasing each camp's current needs.
- Integrated Map Interface: Swiftly locate and connect with nearby refugee camps.
- Education: Empower yourself with insights on effective assistance methods and cultural considerations.

Whether Sweater API | [Repo](#)

Tech: Ruby, Ruby on Rails, BCrypt, VCR/Webmock, JSONAPI Serializer, Brakeman

API built for a fictional Frontend app featuring endpoints for weather, User functionality, and Road Trip creation

- Integrated The Weather API, MapQuest API, and Unsplash to expose unique endpoints
- Features optional temperature query param for C or F (defaults to F)

Label Lens | [FE Repo](#) | [BE Repo](#) | [Deployment](#)

Tech: Ruby, Ruby on Rails, Capybara, VCR/Webmock, RSpotify, OAuth

The application empowers users to discover new music from the perspective of album record labels.

- Integrated OAuth 2.0 login with Spotify to connect users' Spotify accounts
- Enables users to discover new music from the perspective of album record labels.
