

LOURDES BENITES · Front-End Software Engineer

lourdess.benites@gmail.com • [LinkedIn](#) • [GitHub](#)

Languages and Frameworks: JavaScript ES5 & ES6, TypeScript, React, HTML5, CSS3

Testing: Cypress, Mocha/Chai

Tools & Workflow: Git/GitHub, Heroku, Agile, Remote collaboration

UI/UX: Responsive Design, ARIA Accessibility, Figma, Excalidraw

SOFTWARE PROJECTS

[Foodive](#) | Group Project | [Deploy Link](#) |

- Foodive takes the thinking out of picking a restaurant, you simply click on a cuisine option and receive a random restaurant suggestion in your city to try out with business details, rating, and pricing.
- Successfully explored and created this application with PWA in React.
- Technologies: PWA, React, Router, Sass, CI/CD, Cypress testing.

[Brew Match](#) | Solo Project | [Deploy Link](#)

- Brew Match is an app that gives you a few food options that go well with the drink you select! The user is able to save as many pairs as they'd like.
- Used hooks instead of class based components.
- Technologies: React, Router, CSS, and Cypress testing.

[Rancid Tomatillos](#) | Partnered Project | [Deploy Link](#)

- This project is a spin off on the movie site Rotten Tomatoes where the user can browse through a variety of movies, click on one and view details like the overview, description, and ratings.
- Successfully implemented Router, Cypress testing and created this app using React.
- Technologies used: React, Router, CSS, and Cypress testing.

[Travel Tracker](#) | Solo Project

- Travel Tracker is an app where a user can book new trip requests and keep track of past and upcoming trips with the goal to practice fetch requests and unit testing.
- Dynamically displayed images and booking details on client side based on data received from API.
- Technologies used: Vanilla JavaScript, HTML, CSS, Mocha/Chai.

EXPERIENCE

Olive Garden, Server Trainer, Orange, California October 2017-March 2020

- Trained incoming staff in a group of 5 at a time for 7 days on best restaurant practices, culture, and procedures to maximize job satisfaction and productivity.
- Provided continuous evaluation and feedback to server new hires.
- Assigned work tasks and coordinated activities of dining room personnel to deliver prompt, courteous service to patrons.
- Meticulously followed legal and sanitation policies, maintaining an A grading throughout my employment.
- Kept updated knowledge of menu and promotions, recommending specific items according to preferences and food allergies.

EDUCATION

Turing School of Software and Design, Denver, CO

September 2022
