Technical Projects

Mars Chronicles || GitHub || Group

A website that allows users to select a Mars Rover and a date, and view images taken by that rover on that date.
- Created using React, Router, and Redux.
- Uses NASA's Mars Rover API to retrieve images.
- Nominated for Demo Comp at Turing.

Starters and Saviors || GitHub || Solo

A website designed to introduce new players to Dungeons and Dragons 5e in a Wiki-style format.
- Uses React and Router.
- Uses the DnD5e api to pull

What's Cooking || Github || Group

A site that lets users access and save a number of recipes for various meals. Users can save the recipes they like, and see a list of all the ingredients they'd need to make them.
- Uses vanilla JS, CSS, and HTML, but implements Fetch API and Webpack API.
- Data is hosted locally, and persists on page load.
- Uses the MicroModal library to open individual recipes.
