Professional Experience

Software Applications :

Trippy Travel Tracker App.
>Description: Styled and provided functionality using HTML, Javascript and CSS to create a website application.
>Deployment: https://github.com/jmartin777/Trippy-Travel-Tracker

Git Fit Exercise App.
>Description: Group Collaboration. It currently shows a randomized user and all that users data for different aspects of exercise.
>Deployment: https://github.com/jmartin777/fitlit-starter-kit

Whisker Wisdom App.
>Description: React App for users to research and favorite cat facts and add their own.
>
>Deployment: https://github.com/jmartin777/WhiskerWisdom

Avian Anthems App.
>Description:Avian Anthems allows people to listen to birdcalls from many of the most interesting birding areas in the world. Perhaps hearing these avian anthems will inspire people to protect and listen for birds in their off-line worlds
>Deployment: avian-anthems.vercel.app
