SKILLS

React | JavaScript | TypeScript | Redux | React Router | Apollo Client | Cypress | Mocha/Chai | CSS | Tailwind CSS
HTML | Git | GitHub | Vite | Miro | Agile SDLC | TDD | Circle CI

EDUCATION

Turing School of Software and Design, Denver, CO 7/2022 - 3/2023

ACCET Front End Software Engineering Certificate

- Intensive 7 month program with 1,700+ work hours consisting of classes, assessments and 12 group/solo projects building applications, with a focus on problem-solving and agile development methodology.

University of Denver, Denver, CO

9/2006 - 6/2009

Bachelor of Arts: Psychology

PROJECTS

Vinyl Viewer // React, TypeScript, React Router, Sass, HTML5, Cypress { [Deployed Site](#) • [Repository](#) }

React application that allows users to curate a collection of their favorite music albums.

- Coordinated within a team using daily remote stand-ups, problem-solving meetings and setting deadlines to deliver project on time.
- Successfully utilized TypeScript, a previously unfamiliar language self-taught for this project and verified user experience with Cypress testing and careful code review of partners' branches and pull-requests.
- Created and styled search functionality using input forms and result components to fetch API data and display both artists and albums.

Board Together // React, JavaScript, Cypress, Apollo Client, GraphQL { [Deployed Site](#) • [Repository](#) }

Full-stack application where users can trade board games and track their collection.

- As part of the front end team, collaborated with the back end group to design features, database schema, & JSON contract from scratch; communicated with daily remote stand-ups and meetings to troubleshoot between front and back end in an agile workflow.
- Used CircleCI continuous integration and Cypress testing to ensure bug-free user experience.
- Implemented both the login page and the 'borrowing' functionality, creating components and functions that enable user to borrow and return games to other users, with the accompanying visual representations.

Cocktail Evening // React, JavaScript, React Router, CSS3, HTML5, Cypress { [Deployed Site](#) • [Repository](#) }

React application that allows users to search and select cocktails for event planning.

- Carefully planned multi-page app layout and functionality using Miro and GitHub project boards to ensure all user stories and features were achieved accurately and on time.
- Implemented search and filter functionality that pulls from a 3rd party API, as well as the ability to save cocktails to user's collection.
- Created for specific user identity and pronounced UX/UI while responsive across screen sizes; verified with Cypress test suite.

EMPLOYMENT

Front End Developer 3/2023 - Present

Freelance | Denver, CO

- Develop front end web applications tailored to clients' needs with a strong emphasis on user experience, aesthetics, and responsive design. Frequently coordinate with clients from planning stage and throughout the process to ensure final product meets their specifications.

Landman - Senior Landman 9/2013 - 10/2021

Antero Resources | Denver, CO

- Managed approximately 50 closings of acquisitions, trades and leases of oil & gas acreage.
- Negotiated deal terms, reviewed documents with strict attention to detail & overcame obstacles with creative problem solving.
- Managed a team of 20-30 land brokers and oversaw daily operations of a roughly 100,000 acre prospect area.
- Coordinated with internal departments, third-party contractors and law firms to ensure projects were completed on time with strong written and oral communication skills.
- Regularly presented complex analysis to senior management and led weekly interdepartmental meetings.
