SOFTWARE PROJECTS

Beam • [Project Repo](#) • [Deployed](#) • **Express, Knex, postgresSQL, React, Router, Cypress.**

- Developed a full stack self care basic CRUD application that tracks user feelings, journal entries, and the activities they select to mitigate negative emotions.
- This data is stored in a local postgresSQL database created by leveraging collaboratively self-taught proficiency in the Express.js framework and Knex SQL query building.

Bookwise • [Project Repo](#) • [Deployed](#) • **React, Router, Cypress.**

- Bookwise is a frontend application that displays over 150 books and allows users to search and select to find more specific information about a given book. The application fetches and properly cleans data from the NYT bestsellers API and uses React and React Router to provide this functionality.
