

# JOSEPH STEWART. Software Engineer

josephstewart1752@gmail.com • 6096171693 • [LinkedIn/Joe-Stewart](#) • <https://github.com/JoeyStewart>

## SKILLS

---

**Languages/Tools:** JavaScript, HTML, CSS, Python, Powershell, SQL, Tableau, Mocha, Chai, Azure

**Testing:** TDD, End to end testing, Mocha/Chai, Cypress

**Tools/Workflow:** Git, GitHub, GH Pages, Agile practices, Project management tools, Accessibility practices, Restful APIs, Jira, Confluence AdWords manager, Six Sigma, Sharepoint

## PROJECTS

---

**Travel-Tracker**, Solo project | 70 hours |

**Tech Stack:** JavaScript, CSS, HTML

Created a travel agency dashboard that can be accessed through a login page. From there the user can see past trips, approved trips, pending trips, and the total cost of their trips within the last 365 days. They may also submit their own trip which will update the pending, total cost, and destination info widgets.

- Built a fully functioning Travel agency site where you can schedule and see the cost of your trip.

**FitLit**, Team Project | 30 hours |

**Tech Stack:** JavaScript, CSS, HTML

Developed a web application that allows a user to keep track of their fitness goals and display the information on the page. Inserting new information in relation to their recent activities. They are also given a motivational quote on load and are able to log how motivated they feel that day.

- Collaborated on a team of 3 developers to create an application with minimal design direction

**ideaBox**, Team Project | 30 hours |

**Tech Stack:** JavaScript, CSS, HTML

Developed a web application that allows a user to keep track of ideas. The interface allows users to create/display ideas, save ideas to a favorites list and display those separately, and delete ideas.

- Collaborated on a team of 3 developers to create an application with minimal design direction
