- Project management tools

SOFTWARE PROJECTS

Solar Sense , Group | 60 hours | [Repo Link](#) | [Deployed Link](#)
Tech: JavaScript, CSS, HTML, Cypress, React, Node, API, TypeScript

- Collaborated with a team to develop an application which allows users to search locations and view current temperatures
- Integrated a weather API to fetch accurate and up-to-date forecasts, including temperature and weather conditions
- Practiced TypeScript fundamentals effectively, demonstrating the ability to learn and apply new technologies quickly
- Utilized React Router to handle routing and navigation, creating a seamless multi-page user experience.
- Implemented session storage to allow users to save and access frequently visited cities.
- Demonstrated proficiency in testing React components and asynchronous JavaScript code using Cypress for end-to-end testing

Rancid Tomatillos , Group| 22 hours | [Repo Link](#) | [Deployed Link](#)
Tech: JavaScript, CSS, HTML, Cypress, React, Node, API

- Developed an application which allows users to search and view movies and their information using React and Cypress for the first time
- Implemented a dynamic nav-bar for smooth navigation and an enhanced user experience
- Embedded YouTube videos into the movie focus pages, allowing users to watch previews and engage with the content
- Demonstrated adaptability and problem-solving skills in troubleshooting Cypress-related issues
- Showcased a fully responsive application across various breakpoints for optimal user experience
