SOFTWARE PROJECTS

Jana Social - Group Project | **[GitHub](.)** | **[Deployment](.)**   2 week sprint

Description: Jana Social is an application for caregivers of adults with disabilities. It is a place for caregivers to connect with other caregivers, share stories, and find events in their area. This app was created by exposing API endpoints that allow users to chat with others, create events and find friends. Jana Social was created by 12 developers across three different teams.

Tech Stack: Ruby, RSpec, Rails, PostgreSQL, Bootstrap, HTML, CSS, Render

In the Field - Group Project | **[GitHub](.)** | **[Deployment](.)**   12 days sprint

Description: Contributed significantly to the "In The Field" project, playing a key role in designing and implementing the backend infrastructure using Service-oriented architecture and GraphQL on Rails. Responsibilities included centralizing data management for potential mushroom matches, testing API endpoints and ensuring correct data was transferred to the Front End team.

Tech Stack: GraphQL, Ruby, Rails, RSpec, PostgreSQL Render, Postman, CircleCI
