SOFTWARE PROJECTS

Re-sip-e   Group | Github Repo | Deploy Link

React, JavaScript, HTML/JSX, CircleCI, CI/CD, Cypress, CSS, Git/GitHub, GraphQL & RESTful APIs, Accessibility, Webpack

- Collaborated with a team of 7 engineers to develop a responsive cocktail recipe app, utilizing agile practices and structured JSON contracts over a 2-week sprint.
- Implemented CircleCI with automated tests and linter, and conducted thorough code reviews to maintain high quality standards.
- Utilized Github issues for ticketing, enabling efficient task tracking and streamlined collaboration.

Tune-Out   Solo | Github Repo | Deploy Link

React, JavaScript, HTML/JSX, Cypress, CSS, Git/GitHub, RESTful APIs, Accessibility, Webpack

- Created Tune-Out, an app for Hip-Hop and R&B enthusiasts in Seattle to discover their favorite artists performing nearby venues.
- Organized component structure, wireframe, and requirements using Github projects, and Notion to facilitate development using React, React-router, and React hooks.
- Built a clean and interactive user experience, which tested for user pain points and flow through use of Cypress end-to-end testing.
