Empower Retirement

Financial Sales Consultant   Feb 2022 - Jan 2023

- Achieved success in client prospecting and strategic planning, demonstrating the ability to identify and target high-value clients while creating tailored strategies to attract their business.
- Effectively communicated complex financial strategies and introduced potential products to optimize clients' portfolios, showcasing the ability to convey technical information to a non-technical audience.
- Cultivated strong, long-lasting client relationships, emphasizing trust and rapport-building skills to encourage collaboration and achieve mutual goals.
- Applied problem-solving and communication skills to identify clients' needs and tailored solutions to meet their specific requirements.
- Collaborated effectively with clients to align their needs with the services offered, promoting a customer-centric approach.
- Built trust and credibility with clients, underscoring the importance of trust in business relationships and its positive impact on client investments.

Transamerica Advice Center

Retirement Plan Specialist   May 2018 - Dec 2021

- Acquired a deep understanding of complex financial products and services at Transamerica, demonstrating the ability to quickly grasp and master intricate concepts.
- Identified and targeted high-value clients, creating strategic business plans to attract and retain their business, showcasing strong analytical and strategic planning skills.
- Effectively communicated with clients through both inbound and outbound channels, demonstrating strong interpersonal and communication skills.
- Consistently delivered exceptional results by driving monthly business growth, averaging $1 million+ in new business, highlighting a track record of exceeding performance expectations.
- Educated potential and existing clients on comprehensive financial solutions and product offerings, showcasing the ability to translate complex technical information into user-friendly explanations.

PROJECTS

StreetEatz - https://github.com/streeteatz

CSS3, Django, GitHub Projects, Heroku, HTML5, JavaScript, Miro, PostgreSQL, Python, React

Streeteatz is a web based application that utilizes geolocation to find open street vendors and food trucks in your area. Users are able to log in and find a list of nearby option, along with wait time and menu. Vendors are able to log in and set their menu, location and whether they are open for business.
