## SKILLS

**Frontend:** JavaScript | HTML | CSS | React | TypeScript | GraphQL | Cypress | Mocha | Chai

**Other:** GitHub

---

## PROJECTS
**Digital Monsters | [Repository](#) | Solo Project**

Digital Monsters was a solo project application that I created as a fun way to relive my youth. I implemented React and Cypress testing in the project to create a thorough and seamless experience for a user to enjoy! The project took roughly 25 hours in total as a learning/practicing front end developer.
**What I learned/Contributed:**
- I refined React / Router skills
- I built on my knowledge of Cypress Testing
- Continued to refine code development abilities and code understanding concepts.

**Technologies Used:**
- React / Router
- Cypress
- API

**Game Night | [Repository](#) | Full Stack / Capstone Project**

This was my first journey into working with a full stack collaborative team. Throughout the process I assisted in creating the styling of the application, the initial skeleton of the form, component structure, and implementing Cypress testing. The project took place over a two week period where I would frequently interact with the team to assist in keeping us on track and goal focused.
**What I learned/Contributed:**
- Developed knowledge of GraphQL and its uses.
- Built on my knowledge and usage of React / Router
- Continued to refine code development abilities and code understanding concepts.

**Technologies Used:**
- React / Router
- Cypress
- GraphQL

---

## EDUCATION

**Frontend Software Engineering**                     Nov 2022 - Aug 2023 (Expected)
*Turing School of Software and Design, Denver, CO*
