

# Cade Chaney

Junior Front End Software Developer

As a recent graduate of Turing School of Soft and Design I am searching for a Junior Developer role. Prior to studying at Turing I coached and trained Brazilian Jiu Jitsu since the age of 7. Because of my love for grappling and combat sports I got the opportunity to train Greco-Roman wrestling at the Olympic Training Center in Colorado Springs, CO. Today I study coding during the day, but continue to train to become a great combat athlete at night.

## SKILLS

### PROFESSIONAL

- Communication
- Leadership
- Adaptability
- Collaboration
- Attention to Detail

### TECHNICAL

- Javascript, HTML, CSS
- Typescript
- React
- React Native
- Cypress
- Test Driven Development

## ACHIEVEMENTS

National Team Greco-Roman Wrestler  
Olympic Training Center,  
Colorado Springs, CO  
2018 – 2021

Brazilian Jiu-Jitsu Coach  
Various Locations  
2015 – 2022

## EDUCATION

- Liberty High School
  - 2016 - 2018
- Village High School
  - 2018 - 2020
- Turing School of Software and Design
  - 2023 (7 Months)

## SOFTWARE PROJECTS

### ■ Flight Log

Full Stack Group Project | 75 Hours | [GitHub Front End Repo](#) | [Deployed App](#)

- Front End Technology - React Native
- Project Purpose:
  - Problem - User is a pilot that needs an efficient and easy way to log flight information
  - Answer - User now has a mobile application they can have on their phone to log flight info easily and reliably
- Description:
  - With a Full Stack team having FrontEnd building with React Native and BackEnd using Python, we created an app that pilots can use to log their flights on their mobile device

### ■ Avian Anthems

Group Project | 65 Hours | [GitHub Repo](#) | [Deployed App](#)

- Front End Technology - React, Typescript
- Project Purpose:
  - Problem - User is someone who has gained a recent interest in birds and wants to listen and learn about birds around the world
  - Answer - User can now easily navigate a site that is responsive on any device to fulfill their curiosity
- Description:
  - With a Front End team first learning about typescript, we constructed an app that allows anyone to search and discover new bird sounds from across the globe
