---

### School History

**Turing School of Software and Design:**

Back-End Software Engineering, 2021

**Colorado State University-Pueblo:**

Bachelors of Science, Automotive Industry Management, 2010 - 2014

---

### Professional Accolades

3 time consecutive President's Award for Sales Excellence - 2018, 2019, 2020

Organization of the Year - 2012

---

### Personal Summary

I am a goal driven top performer that thrives on a driver personality. I enjoy setting SMART goals of leveling difficulty to continually challenge myself.

---

### Projects

**Worth Wild:** A CORS group project(FE-JS/BE-Ruby) that expanded across 15 days. This project used an agile workflow to construct a web application that allowed visitors to research endangered species. On the back end we used multiple microservices to feed into a main backend repo. Consumed 3rd party api links in the microservices and exposed custom json responses based on FE needs.

**Viewing Party Lite:** A Ruby on Rails paired monolith project that expanded 4 days. This project used rails to create a movie watch party website that allowed users to search for different movies, create viewing parties for those movies and invite their friends to those parties.

---

### Professional Experience

**Sherwin-Williams:** May 2014- June 2021

Management Trainee, Assistant Branch Manager, Assistant Sales Manager, and Store Manager. (Two different divisions)

- Quality Assurance, Staff Scheduling/Hiring, Inventory Management, Supply Chain Management, P & L Balancing, Sales(Inside/Outside)
