- Knex.JS

### SOFTWARE PROJECTS

---

#### Got Baggage | Team | [Got Baggage Deployment](#) December - 2022

Created a packing list app that generates a list of items that you would need for a trip and for a specific activity.

- Built using React, and GraphQL.
- Built with a combined Front End and Back End team, working collaboratively in an agile workflow process. Both teams implemented GraphQL for the first time and used CircleCi for continuous integration.
- React, JavaScript, React-Router, GraphQL, CircleCi, Cypress

#### Radiance | Team | [Radiance](#) November - 2022

Created a daily affirmation app that generates a random affirmation of the day.

- Built using Express, Knex, PostgreSQL, Node.js, and React.
- Built with a four-person team.
- React, JavaScript, Knex, Express, PostgreSQL, Cypress

#### Color Random | Team | [Random Colors App](#) July- 2022

Created random color palette generator that allows users to create and save a new color pallet. The app provides Hex codes allowing users to use them in their own projects.

- Built using DRY/SRP JavaScript
- JavaScript, CSS, HTML
