Projects

Solo project

[MtG Deck Builder](#) | [Repo](#)

- This web application was built using React and Router and was tested using cypress
- Responsive web application that allows a user to view any Magic the Gathering card and add them to a deck. The user can click on any card to view more details about that card.

Group project - 4 people

[Pawfect Match](#) | [Front End Repo](#), [Back End Repo](#)

- Built using React, Router, Micro Modal, Knex, PostgreSQL
- Pawfect Match is a responsive web application that matches a user with the right dog breed for their lifestyle.

Group project - 7 People

[Backcountry Bookings](#) | [Front End Repo](#)

- This web application was built using React, Router, Typescript, Google Maps API and was tested using cypress
- Responsive web app that allows a user to search for national park campsites in a variety of ways. A user can favorite sites, leave reviews and view many details about the sites.

Education

May 2022 - April 2023

Turing School of Software Design, Denver CO

Experience

December 2020 - January 2022

Best Buy, Newington CT - *Mobile Sales*

Worked mainly in the mobile department and was responsible for activating phones, applying screen protectors and selling anything in any department of the store.

2018 - 2020

Snarf's Sandwiches, Multiple Locations - *Supervisor*

I was a supervisor at Snarf's sandwiches in multiple locations, I was responsible for opening/closing the store, managing a team of up to 8 people, ordering supplies, taking inventory and was responsible for managing catering orders.
