Patrick Eitel

FRONT END SOFTWARE DEVELOPER

PatrickEitel12@gmail.com • (760)937-4631 • [LinkedIn](#) • [Github](#)

PROGRAMMING SKILLS

Languages/frameworks: JavaScript, HTML, CSS, ReactJS
Testing: Chai + Mocha (Unit Testing), Cypress (E2E Testing)
Tools/Workflow: Responsive Design, Test Driven Development, Git / GitHub, Router, Redux, Figma

SOFT SKILLS

Leadership, Attention to detail, Communication, Problem solving, Creative thinking, Adaptability, Conflict resolution

PROJECTS

19Check, Solo Project | 40 Hours | [Deployed Link](#)
19Check was built from the ground up to solve a problem I was having in a game called World of Warcraft. I was relying on ugly, unstructured data to find items I needed to collect. This was my first experience building out and deploying my own API, I used said API to layout all relevant WoW data in a clean and organized fashion. 19Check was eventually scaled to be helpful to many other WoW players.
Technologies Used: ReactJS, Router, Cypress, JavaScript, HTML, CSS

The Met Gallery, Group Project | 40 Hours | [Deployed Link](#)
An online museum. The Met Gallery was my first introduction to redux, which my group and I learned and implemented in less than a week. An exciting and mind opening experience for all of us to see the benefits of using global state management!
Technologies Used: Redux, ReactJS, Router, Cypress, JavaScript, HTML, CSS

What's Cookin'?, Group Project | 30 Hours | [Repo Link](#)
A website built from the ground-up with HTML, CSS, JavaScript, and an external API. This site allows users to interact with a collection of recipes and filter them based on applied tags. This project was a collaborative effort with 2 other partners.
Technologies Used: HTML, CSS, JavaScript, Mocha, Chai, API.

PROFESSIONAL EXPERIENCE

Onny's Thai Restaurant, Server 2017-2023
- Taught me to be adaptable in many situations.
- Prioritize tasks and perform under pressure, on some nights when short staffed this was critical.
- Teamwork and effective communication, my strong interpersonal skills were essential at Onny's.

EDUCATION

2023 - 2024

Turing School of Software and Design, Denver, CO

Accredited Frontend/Backend Software Engineering Certificate
