SOFTWARE PROJECTS

small Talk, Group (3 person team) Project, [Deployed App](#), [GitHub Repo](#).

- Learned a new technology (Vue.js) and built an app within a week; small Talk gives users random facts, jokes and drinks to help being awkward at parties.
- Built with global state management (Pinia) to streamline development and easily share state data
- Utilized local storage to persist saves on reload.
- Tech Stack: Vue 3 (Composition API), Pinia, CSS. Tested with Cypress.

sombor shuffle, solo Project, [Deployed App](#), [GitHub Repo](#).

- Sports stats app built in 4 days, focusing on learning and implementing React Hooks
- Utilized user personas, Figma and responsive CSS to create a clean UI for multiple screen sizes
- Tested external API endpoints with Postman
- Tech Stack: React, React Router, CSS. Tested with Cypress.

Rancid Tomatillos, Pair Project, [Deployed App](#), [GitHub Repo](#)

- Built a movie app in 9 days that displays a grid of movies and information about each movie
- Tested all user flows and sad paths with robust end to end testing in Cypress
- Utilized Trello for project planning which included user stories and acceptance criteria
- Tech Stack: React, CSS and HTML. Tested with Cypress.
