SOFTWARE PROJECTS

What In The World, Solo Project ∣ [Repo](#) | [Link](#)
Tech Stack: React, React Router, Cypress, CSS
"What In The World" is a user-centric platform engineered to offer comprehensive insights into countries across the globe. This solo project showcases multiple technologies and responsive design principles.
- Utilized Canva and Notion for wireframing and project planning
- Designed and built from the ground up to display proficiency in UI/UX design, user flow, and the implementation of multiple technologies
- Employed Cypress E2E testing to validate user stories and personas

Rhythm & Rizz, Group Project ∣ [Repo - API](#) ∣ [Repo - UI](#) ∣ [Link](#)
Tech Stack: React, React Router, Node.js, Express.js, Cypress, CSS
In the collaborative project, Rhythm & Rizz, we developed a platform for browsing and submitting poems. We employed Cypress E2E testing for validating user stories and personas and followed agile processes with daily stand-ups for effective project management.
- Created restfulAPI's for our FE application to consume
- Employed Cypress E2E testing to validate user stories and personas
- Followed agile processes with daily stand-ups for effective project management

Rancid Tomatillos, Pair Project ∣ [Repo](#) | [Link](#)
Tech Stack: React, React Router, Cypress, CSS
Rancid Tomatillos was my inaugural project in React, a pair project that enables users to explore movies with user-centric features.
- Utilized React Hooks for state management and agile processes for effective project planning
- Employed Cypress E2E testing to validate user stories and personas
