- **Languages/frameworks:** JavaScript, React, React Router, HTML, CSS
- **Testing:** Mocha/Chai, TDD, Cypress, E2E
- **Tools/workflow:** Git, GitHub, NPM
- **UI/UX :** User stories and personas

SOFTWARE PROJECTS

Rancid Tomatillos, Pair Project |15 hours| [Repo Hyperlink](#)
Tech Stack: Javascript/React/Router/Cypress/HTML/CSS
Developed a web application with a movie database, where the user will see all the movies available on the main page and once one is selected, a second page will display additional details about the movie and a movie trailer.

Mars Chronicles, Team Project |15 hours| [Repo Hyperlink](#) | [Deployed Link](#)
Tech Stack: Javascript/React/React Router/Redux/HTML/CSS/Cypress
Using NASA's past and current Mars rover missions, we developed an app that lets the user choose between the four Mars rovers and view their mission statement as well as pictures taken during their mission which can be filtered by using a Mars sol or Earth date.
