TARYN ORLEMANN SOFTWARE ENGINEER

taryn.orlemann@gmail.com • 415.717.5267 • [LinkedIn](#) • [Github](#)

Motivated, adaptable, team-oriented developer with a strong foundation in computer science concepts and practical experience building and maintaining web applications, with a penchant for problem-solving and a drive to continuously learn and improve. Seeking a dynamic and fast-paced environment where I grow and evolve as a developer and make a meaningful contribution to a team and the planet. I am energized by the exchange of knowledge and am empathetic, transparent, and constructive in my communication and feedback. I believe in advocating for and empowering others to achieve their goals.

SKILLS

Languages/Frameworks: Ruby, Rails, PostgreSQL, SQL, GraphQL, HTML, CSS, RSpec, JSON
Technologies/Tools: GitHub/Git, Heroku, Postman, Postico, ActiveRecord, CircleCI, Bootstrap, ActiveRecord
Methodologies/Other: Object Oriented Programming and Design, Test Driven Development, Agile workflow processes, Service Oriented Architecture, REST API, Object-Relational Mapping
Exposures/Currently Learning: Javascript, AWS, Docker, Python

PROJECTS

Equilibrium Team of 7 • 14-day sprint • [Repository](#) • [Production](#)
Full-stack collaboration project providing filterable database resources for therapy services in the Denver, CO area. Current iteration is demoed with fictional characters as therapists.
- Implemented GraphQL mutations and queries to streamline information for the front end team.
- Created a mock server via Postman for use by the front end team.
- Debugged deployment issues between CircleCI and Heroku.

Lunch and Learn Independent Project • 5-day sprint • [Repository](#)
Backend Rails API built to meet specifications and wireframes provided by a Frontend team.
- Consumed multiple external APIs to return tailored JSON responses.
- Built all endpoints adhering to REST principles.

IONO Team of 4 • 11-day sprint • [Repository](#)
Web application utilizing Service Oriented Architecture design that returns a random restaurant to the user based on their IP address.
- Created wireframes/user stories through project team collaboration.
- Implemented Google OAuth for user authentication and Bootstrap for styling.

SELECTED EXPERIENCE

Food Safety and Quality Assurance Manager   July 2021 - June 2022
Torn Ranch, Petaluma, CA
- Maintained regulatory compliance and certifications. Reduced production errors and delivered safe and quality products to stakeholders through continuous improvement of FSQA systems.
- Managed multiple programs and projects, including audits, documentation, product specs and databases.
- Supervised employees, established production workflows, and managed training for 70+ employees.

QA Supervisor and Lead Cheesemaker   March 2016 – May 2021
Point Reyes Farmstead Cheese Company, Point Reyes Station, CA
- Managed quality assurance objectives and product testing to meet production goals.
- Supervised production departments and worked cross-functionally to revamp training programs.

EDUCATION

Turing School of Software and Design, Remote   July 2022 - January 2023
ACCET Accredited Backend Engineering Certification
- 1500+ hours of programming experience, including immersive training in Object Oriented Programming and web applications with Ruby, and professional Rails applications.
- Cohort rep on the Student Leadership Committee, working collaboratively with 12-16 other reps to promote student interests, engagement, and inclusion.
