# RACE OSUNA – Software Developer

Denver, Colorado   • raceosuna@gmail.com • 719-213-6537

Linkedin | Github

## Summary

I set down the shaker and picked up JavaScript! I'm an ex Bartender turned Front End Developer. I leverage a strong background in communication and customer satisfaction to create delightful and interactive web applications. I'm looking for a company with a passionate team that's motivated to develop a product they believe in and improve their skills as developers.

## Skills, Languages & Workflow

**Languages/Frameworks/Libraries -** CSS, HTML, JavaScript, Node, React, Svelte, Tailwind, TypeScript, Webpack
**Testing -** Chai, Cypress, Mocha
**Tools -** Canva,  DevTools, Figma, GitHub, Visual Studio Code
**Process -** Agile, CI/CD, Git, Test Driven Development
**Other -** PWA, RESTful API

## Software Projects

**Wingman** | JavaScript,  React, HTML, CSS, Cypress

Live Site - Wingman
- Developed a sidekick application for the videogame Apex Legends. This app allows a user to login using their selected gaming platform and username. They can view their personal stats and news about the game.
- Built using React, React Router, React Hooks, Apex Legends API and end to end testing with cypress

**Munch Madness** | TypeScript, React, HTML, Tailwind CSS, Cypress

Live Site - Munch Madness
- Teamed up with a squad of developers to develop a one-of-a-kind app that transforms restaurant selection into a thrilling tournament-style showdown. Users create brackets pitting their favorite eateries against each other, and through a series of epic votes, a culinary champion emerges victorious.
- Successfully installed a service worker to enable data caching; Making the app accessible anytime while delivering an optimized user experience.

**Rancid Tomatillos** | JavaScript, React, HTML, CSS , Cypress

Live Site - Rancid Tomatillos
- A movie application that renders movie data from an external API and allows users to search movie by title and view their details
- Implemented user-friendly UI features, such as data filtering, sorting, and pagination to improve usability and accessibility.

## Professional Experience

**New Belgium Brewery DIA** | Bartender | 2019 - 2022
- Worked on a team of bartenders to provide exquisite service to over 250+ customers per day
- Adapted quickly to fast-paced and dynamic work environments, consistently meeting demanding service standards.
- Exhibited multi-Tasking and problem solving to concoct multiple beverages at a time for guests to enjoy.
- Demonstrated strong communication and interpersonal skills to effectively handle customer inquiries, address concerns, and ensure a positive dining experience in a hectic and time sensitive environment.

**Paravicini's Italian Bistro** | Server | 2013 - 2019
- Demonstrated problem-solving by resolving any guest concerns or special requests effectively.
- Effectively coordinated with kitchen and waitstaff to ensure seamless operations and timely service.

## Education & Certifications

**Turing School of Software and Design**               Frontend Software Engineering                2023
