OSCAR SANTOS
BACK END SOFTWARE DEVELOPER

Denver, Colorado oscar303data@gmail.com 720-649-2594 Linkedin | Github

SUMMARY

I have a non-traditional developer background focused in customer service experience and economic theory. My focuses as a backend developer are: Ruby on Rails, TDD, API and dev ops. I am also a fluent Spanish speaker and very excited to grow my programming skills.

SKILLS

- Ruby
- OOP
- ActiveRecord
- Rails
- TDD
- Version control (Git)
- CRUD
- Heroku
- Rest API
- RSpec

PROJECTS

History Maps Github-Repo Heroku-App   8 Day Group Project
Language: Ruby on Rails
- Web application which allows users to see historical pictures of an address that they input, either partially or fully.
- Collaborated in a group of 6, created API endpoints to consume data from Mapquest and the Library of Congress.
- Processes used: agile, service oriented architecture, TDD.

Weather Sweather Github-Repo   5 Day Solo Project
Language: Ruby, Ruby on Rails.
- Created a back end rails application to plan road trips and provide weather data along the way. Used OpenWeather, MapQuest and OpenLibrary API's.

Viewing Party Lite Github-Repo   5 Day Duo Project
Language:Ruby on Rails.
- Collaborated in a Rails application in which users can explore movie options and create a viewing party event for themselves and others to watch together, online.
- Built API's to consume data from The Movie Database, which is a TV Database, and created tests for the entire application.
