SOFTWARE PROJECTS

Jana Social, Team Project | 2 week sprint

Tech Stack: Ruby, Rails, RSpec, Capybara, Active Record, HTML, WebMock, VCR, Capybara, Oauth, Bootstrap, Geolocate, Action Cable

Developed a web application that helps caretakers of individuals of disabilities to find other caretakers to create safe events, meetups and connections.

- Exposed 6 API endpoints for a frontend application to consume and participated in API contract design and discussions
- Managed agile processes, including Mirro Boards and Github projects boards for a team of 12 (The largest team in Turing's History)
- Incorporated project managers & mentors feedback through ongoing code reviews.

EverUse, Team Project | 2 week sprint

Tech Stack: GraphQL, Ruby, Rails, Javascript, RSpec, Capybara, Active Record, HTML, CSS, Circle CI, New Relic

Contributed to the successful creation and deployment of a fully functional ecommerce platform, enabling EverUse to effectively showcase and sell their products.

- Collaborated as a part of a cross-functional team (FE and BE)
- Worked closely with the client to ensure the project aligned with their specific needs
- Demonstrated adaptability by rapidly acquiring proficiency in the GraphQL framework
- Contributed to the successful creation and deployment of a fully functional ecommerce platform

PROFESSIONAL EXPERIENCE

Coors Distributing Co, On Premise Account Manager, Denver, CO 05/2016 - 06/2021

- Managed over 160 on premise accounts (bars, restaurants, golf courses, etc)
- Used VIP and Tableau account management software to track sales
- Improved on premise sales metrics for Downtown Denver and had highest Constellation sales numbers in company
