Creative Front-End Web Developer

Thoughtful front-end web developer with a previous background in front-end/LAMP development. Passionate about utilizing technology to make a difference, working collaboratively to build and promote growth, developing creative and intuitive UI/UX, and bringing access and help to those who need it.

Skills

React, JavaScript, SCSS, Cypress, Mocha/Chai, Git/GitHub, TypeScript, Susy Grid System, jQuery, HTML, CSS, Webpack, E2E/TDD, UI/UX, OOP, MVC

Exposures

Ruby, Rails, ActionCable, Redis, SQL, Express, SVN, C++, Docker, AWS, LAMP

Projects

Tribe - <https://github.com/Tribe-Turing> - Built with React/Rails/PostgreSQL/WebSockets

- An interest based friendship chat app, display and filtering users with similar interests.
- Collaborated with the BE team to set up relational databases for users and their chats.
- Implement CRUD methods for users to start a new convo, chat, and update their profile.

Knitly - <https://github.com/Prkr93/knitly> - React/SCSS

- A knitting chart maker app, with the ability to create, save, and view other submitted patterns.
- Custom Express server built for serving and saving patterns through the Fetch API.

Experience

PERSONAL SHOPPER, INSTACART – 2021-2022

- Maintained a 5.0 star custom rating for speed, communication, and effectiveness.

FRONT-END WEB DEVELOPER, BIDPATH/SAM – 2015-2018

- Helped lead the development and migration of the older theme to a new responsive, mobile-friendly theme for the SAM (Smarter Auction Management) software.
- Crucial in the development of a framework to give back-end developers the ability to style elements across dozens of webpages, similar to Bootstrap.

Education

Turing School of Software & Design – 2022 - Certificate in Front-End Engineering

University of Illinois at Urbana-Champaign - 2011-2014 - Food Science/Human Nutrition
