Skills

Languages: Ruby On Rails, Ruby, GraphQL, SQL, HTML5, CSS3
Databases: PostgreSQL
Tools/Practices: Git, CircleCI, TDD, RSpec, Capybara, REST, Github, Heroku, Postman, Postico, Atom, VS Code

Projects

Moon Garden | 6 contributors
This is a lunar garden tracker application deployed on Heroku with Rails using SOA to connect front-end and back-end Rails applications with 7 APIs. I connected the front-end to the back-end using RESTful practices and handled the consumption of 3 APIs for the front-end.

Sweater Weather | 1 contributor
This is a solo back-end application that consumes 2 external APIs (MapQuest and OpenWeather) and exposes endpoints for a front-end application to consume. Allows an origin and destination to be sent, and the time to travel and the weather forecast upon arrival will be returned in JSON. Also includes basic user authentication with generation of API tokens for users.

Experience

Skilled in critical thinking, problem solving, working independently, teamwork/collaboration, time management skills, communication, analytical thinking, and attention to detail.

July 2015 - March 2022
Target, Pleasant Prairie – *Fulfillment Expert*

Helped lead the fulfillment team through the modernization of our department. Picked and packed hundreds of orders per shift in a timely manner. Practiced customer service skills while out on the sales floor by helping guests whenever possible.

September 2021 - January 2022
Chicago Tag & Label, Libertyville, IL – *Press Operator*

Self-reliantly ran a press for the entirety of my shifts overseeing the manufacturing of thousands of paper and label products per day while simultaneously fine-tuning the press when needed. Handled set-up and tear-down/clean up of the press in between job runs. Adhered to customer's specific standards with attention to detail. Gave helper direction and supplied their packing materials.

Education

March 2022 - September 2022
Turing School of Software & Design, Denver, CO – *Certificate of completion in Back-End Engineering*
