PROFILE SUMMARY

I am a Denver local career-changer currently enjoying the wide world of Back End Engineering and all the learning opportunities it provides. After 13 years in Multi-Family Property Management I decided it was time I actually do something I enjoy. I am currently wrapping up my time at Turing and eagerly looking for the next challenge in Software Development. I am very open to back end or full stack positions where I can continue to learn and become a better Dev every day.

TECHNICAL SKILLS

Ruby on Rails	TDD RSpec	Progresql	SQL
GitHub	Heroku	OOP	Trello
HTML	CSS	MVC	Databases

PROJECTS

HISTORY MAPS (GROUP PROJECT)

- Built a Ruby on Rails App from scratch to help users find historical photos and facts from the Library of Congress based on a user input address or location ran through Mapquest API
- From the landing page a user login with Google Oauth, search any location in the United States and find get photos from that location and save their favorites to view later.

ADOPT, DON'T SHOP (PAIRED PROJECT)

- Built an application with Ruby on Rails to manage the database of a pet shelter.
- Through the app a user could see an inventory pets up for adoption, apply for adoption, and be approved for adoption.

NIGHT WRITER

(SOLO PROJECT)

- Created a program to translate english text into brail and create new translated files using Ruby
- Each translation is made more readable by being limited to 40 english characters
- Used Test Driven Development to ensure functionality of the app and readability.

WORK EXPERIENCE

Regional Property Manager August, 2011 - July, 2021
Cornerstone Apartment Services, Denver

- Oversaw the daily operations of up to 26 rental properties(500+ units) in the Central Denver Market
- Directly Managed a team for all Maintenance, Leasing, and Capital Improvement Projects
- Built and implemented many tools and standards for the position that are still in use at the company today
- Managed more than \$50,000,000.00 worth of assets

EDUCATION

Turing School for Software Engineering & Design 2022 - 2022
Certificate of Completion Back End Engineering Program

University of Colorado, Boulder 2006 - 2008
Majored in Marketing
