TECHNICAL PROJECTS

Inner Worlds | Group Project | 60 hrs | [Repo](#) | [Deployed](#)
Inner Worlds is an immersive application focused on dream-logging and analysis. This project involved tackling unfamiliar technology such as GraphQL, successfully collaborating within an 8-person cross-functional team, and overcoming challenges in cache management and Apollo Client errors. The end result is a unique tool for self-discovery and dream exploration.
- **Tech Stack: React, Router, GraphQL, Swiper, Chroma.js, Chart.js, Cypress, CI/CD**

ZingerZ | Group Project | 40 hrs | [Repo](#) | [Deployed](#)
ZingerZ is a retro-themed web application that offers users a continuous stream of random jokes or the ability to search for jokes using keywords. This project was an opportunity to learn new technology (TypeScript), implement a responsive design and build upon React fundamentals with Hooks..
- **Tech Stack: React, Router, CSS, TypeScript, Cypress, Node/NPM**

Rancid Tomatillos | Paired Project | 30 hrs | [Repo](#) | [Deployed](#)
Rancid Tomatillos is a movie rating site that features clickable movie posters to reveal detailed information about the selected movie or the ability to search for a specific movie title. This project's focus was to self-teach new concepts, conduct comprehensive Cypress testing, and incorporate accessibility features for a more inclusive experience.
- **Tech Stack: React, Router, CSS, Cypress, Node/NPM**
