Andrew Stilmock

andrew.stilmock@gmail.com - **LinkedIn** - **GitHub** - (402) 416-4413

SKILLS

- Languages/Frameworks, testing and tech: Ruby, Rails, Sinatra, PostgreSQL, Git and GitHub including GitHub Projects, TDD, RESTful APIs, JSON and JSON API contracts, RSpec, Simplecov, Heroku, Render, CircleCI/CD, CORS, Google API services, Miro, Jira

- Teamwork, Professional and other: logic-based problem solver, self-starter, leadership proficiency, strategy and project management. Agile, flexible team player with excellent communication.

PROJECTS

FoodHaven - Application Deployment
- Demo Competition Cup winning application submission: Mobile friendly GPS service application for locating farmer's markets with SNAP benefit availability using Google maps API functionality to locate public transportation.
- Personal contribution was application-wide and involved all aspects of project development. Sinatra was utilized for speed of access to the microservice database in order to Extract Transform and Load the data in an extremely fast manner compared to using a Rails framework for the microservice.

Munch Madness - Application Deployment
- NCAA Basketball bracket style application where users create brackets of nearby restaurants and vote on establishments until a winner is selected as a place to eat. Location based on zip code and bracket size is variable.
- Personal involvement was creating the back end Rails API application as well as the front end Service Worker in JS, TypeScript and Node.js to make the project a Progressive Web Application.

Lunch and Learn - GitHub Repository
- API application exposing various API endpoints to return JSON response data for a front end application.
- Personal contribution was application-wide and involved all aspects of project development.

Rails Engine - GitHub Repository
- API application exposing various endpoints to return JSON response data for a Rails Engine front end application.
- Personal contribution was application-wide and involved all aspects of project development.
