

Andi Lovetto

Software Developer

719-427-9927 • andilovetto@gmail.com • [linkedin](#) • [github](#)

SKILLS

Languages/frameworks: Ruby | Rails | HTML | SQL | CSS | ActiveRecord

Testing: RSpec | Postman | Test Driven Development | VCR

Tools/Workflow: TDD | BDD | Git | GitHub | Rest APIs

Currently learning: Rails

SOFTWARE PROJECTS

Label Lens (group) | FE: [Repo](#) BE: [Repo](#) | **Tech:** Ruby, Rails, HTML, CSS, Javascript, RSpotify

Created and developed a Rails application facilitating music discovery, providing users with curated playlists of albums by the same record label as the selected album.

- Managed project development and organization and maintained detailed project documentation.
- Adhered to Ruby convention with proper syntax, implementation of Facade Design pattern and CRUD functionality, and thorough review of PRs prior to approval.

GearUP (group) [GitHub Organization](#) | **Tech:** GraphQL, Rails, Ruby, Postgresql, VCR, Postman

Built a crowdfunding full stack application using GraphQL and Rails for artists to request supplies needed for their next project. GearUp allows users to create accounts and make posts, and allows donors the opportunity to make a difference by donating to an art project.

- Problem-solved, debugged, and overcame group blockers through diligent research of unfamiliar errors.
- Focused group energy on achieving minimal viable product.

RELEVANT WORK EXPERIENCE

Land Title Guarantee Company, Denver, CO

2018 – 2023

Title Examiner

- Led the commercial department's transition from paper-based to digital information processing by implementing changes in the searching role, ensuring a seamless shift to paperless processes.
- Managed end-to-end organization, search, and meticulous evaluation of 400+ properties, resulting in a successful \$200 million deal acquisition and the establishment of a long-term client relationship, showcasing strong time management, organizational skills, and attention-to-detail.

EDUCATION

Turing School of Software and Design, ACCET Accredited Program - Certificate of Completion 2023

An immersive 7.5-month program involving over 1500 hours dedicated to becoming a software-ready engineer focused on Object-Oriented Programming, Test-Driven-Development, an Agile workflow, developer empathy, and accessibility for all users through project-based learning, professional development, and coursework.
